

# ASD Travel Advice Service

## How to help?

**Offering travel advice.** Apps like **Citymapper** and **Google Maps** often offer us the fastest routes. This information isn't always useful to someone who needs a quiet route and clear instructions.

We can be much more accommodating if we are able to help our audiences find the best route for them.

The image displays two screenshots of a mobile application interface. The left screenshot shows a search for routes from Teddington to Milton Court, with a keyboard and filter options. The right screenshot shows the results for 'Quiet public transport'.

**Left Screenshot: Search Interface**

- Carrier: 10:10 AM, 100% battery
- Search: To Milton Court From Teddington
- Keyboard: q w e r t y u i o p, a s d f g h j k l, z x c v b n m, space, return
- Filters:
  - Quiet public transport (selected)
  - Fastest public transport
  - Bus only public transport
  - Alternative public transport

**Right Screenshot: Results for Quiet public transport**

- Teddington**: South Western Railway, 4 stops
- Richmond**: East Bound, 22 stops, First stop on tube ride Kew Gardens
- Tower Hill**: East Bound, 3 stops, First stop on tube ride Aldgate
- Moorgate**: 4 minute walk
- Milton Court**

Legend for results:

- Fastest public transport (green)
- Bus only public transport (pink)
- Alternative public transport (orange)

Above is an example of the kind of information you might have to provide someone.

To start with you could advertise it clearly on your website, to your hidden disability audience, as as service people have to request but ultimately this would become a service that works on the website and generates answers- like how citymapper and google maps works.
